

Promotion Guidance for AgriLife Research Faculty Task Force

Progress Report - June 2021

Task Force members met on June 1 and reviewed the survey responses from the five categories of survey stakeholders: Center Directors, Department Heads, P&T Chairs, recently promoted faculty, and recently mid-term reviewed faculty. Summary reports for each category were developed. The committee again met on June 21, discussed these summaries, and decided to develop an overall synthesis of these individual category summaries. We now have a summary report prepared which will be used to craft the promotion guidance document for AgriLife Research faculty. A “standard operating procedure” as an addendum (supplementary document) to the promotion guidance document is also being developed. We plan to submit the final report later this month.

International Research and Development in AgriLife (Task Force #9) Progress Report - June 2021

The International Research and Development in AgriLife Task Force conducted its subcommittee tasks through email communications, and the full committee met via TEAMS on 11 June 2021. Survey questionnaire has been finalized and is being developed in Qualtrics. We plan to send out the questionnaire for survey in mid-July for a two-week survey. The outline of the final report has been prepared, discussed, and finalized. Once the survey results are available, data will be analyzed, and final report will be prepared. We anticipate having the final report completed in late August.
